

TRUSTEDDOCKS.com

We know where ships are docking.

www.trusteddocks.com/shipyards

trusteddocks allows shipyard owners to present their company, services and facilities on the internet free of charge. Shipyards can receive feedback from their clients and show their reference projects. The newbuild module gives information about new projects in the industry while the scrapping module informs about vessels leaving the market. The maintenance module contains all actual and historic dockings for all shipyards around the world and the forecast gives an indication which ships and shipowners need docking capacity in specific regions.

FEATURES

- Complete knowledge about newbuild activities of the whole industry
- Actual and historic dockings from all ships around the globe
- See utilization and usage of particular shipyards
- Docking forecast for vessels and fleets for specific regions
- Scrapping activities from wrecking yards
- Offer you services & present your shipyard & facilities
- Receive ratings and accommodations from the shipping community
- Search for engines, equipment and 2nd hand spare parts

BENEFITS

- Have direct contact to shipowners & managers and receive feedback
- Tailormade your offers to clients that sail in your area
- See where your clients are docking and when they need your capacity
- Keep an eye on competition
